SUMMARY

Front end developer with over 3 years' experience, experienced in developing web projects, specialized in web application development using JavaScript frameworks like react.js and nextjs, I love learning and am extremely excited to build more projects to get more experience.

Experience

Front End at Active4web

08/2023 - present

Tech stack: html, css, javascript, bootstrap, react.js, react bootstrap, redux toolkit, redux query.

- Developed Link pages to active4web website.
- Completing work on a hospital management project.
- Still implementing an ERP system.

03/2023 - present

Front End at EraaSoft

Tech stack: html, css, javascript, bootstrap, webpack, react.js, redux toolkit.

- Figma project has been converted to code.
- Explanation of lectures for students.
- Correction tasks for students.
- Help students solve problems.

Group education as Mentor

01/2022 – 03/2023

This is a unique experience as it is the first time for me to explain to anyone.

Tech stack: html, css, javascript, bootstrap.

- Gained experience in explaining.
- This made me study more, research more into every technology I am about to explain.
- It added to my communication skills.

SKILLS

HTML	TypeScript	Pug.js
CSS	jQuery	Redux Toolkit
Bootstrap	React.js	Redux query
Tailwind CSS	Next.js	React hook Form
Sass	Webpack	Git & GitHub
JavaScript	Gulp.js	

Projects

The Union School

This system serves the school so that you can control everything related to teachers, students, classes, schedules, you can add, modify, or delete [classes, schedules, students, teachers] and more.

- Tech Stack: react js, redux toolkit, react-bootstrap, json-server, json-server-auth, react-icons, react-hook-forms, yup validation.
- GitHub: <https://github.com/Yasser-Alnajjar/The-Union-School>
- Live: <https://the-union-school.vercel.app>

Miral Hr.

These hr management system manages all operations of the company's employees, where you can add, modify, or delete [branches, departments, employees, tasks, attendance, salary adjustments], (I am creating backend to this project to replace json-server)

- Tech S
- tack: nextjs, sass, redux query, react hook form, react-hot-toast, react-icons, sweetalert2, react-chart-2, json-server, json-server-auth.
- GitHub: <https://github.com/Yasser-Alnajjar/Mitral-HR>
- Live: <https://mitral-hr.vercel.app>

Blog App

This is a blog application to view posts and users and you can interact with any post, (Add post, update post, delete post, get user posts, edit user posts) the main concept, in this project is redux toolkit.

- Tech Stack: react.js, css, axios, date-fns, react-router-dom, redux-toolkit, react-hot-toast.
- GitHub: https://github.com/Yasser-Alnajjar/Blog_App
- GitHub: <https://redux-blogs.vercel.app/>

Education

Al-Azhar University – faculty of sharia and law
